

Prototypes

Important

Any prototype code is **NOT** to be used for production, these are just a tool to test our assumptions and hypothesis.

Versioning the prototypes

We are following the [guidelines described here](#) by Alex Torrance at GDS on versioning the prototype. Using tags means we can have up to 100 unique prototype versions with URLs.

Managing the prototypes

The prototype and all versions are on Heroku. All can be accessed using [Gareth Joyce](#)'s account.

Previous versions

As this project was started in 2016 and paused then restarted in 2018/2019 we have archived the old prototypes.
